GÖTTINGEN

Göttingen Graduate School for
Neurosciences, Biophysics, and Molecular Biosciences

Dr. Stefan Uhle:

Patent Manager LifeSciences & Biotechnology,
MBM ScienceBridge GmbH

"Patenting and Commercializing Scientific Inventions"

Monday, 31 October 2016, 16:00 - 17:30h

Ernst-Caspari-Haus / GZMB
Justus-von-Liebig-Weg 11
37077 Göttingen
Seminar room 0.232

MBM ScienceBridge GmbH is the technology transfer organisation
of the Georg-August Universität Göttingen.

Summary

This talk gives information about the commercial utilization of research results and inventions. Some of the issues to be discussed are:

- How can research results be commercialized successfully?
- In the context of my research project, I have made an invention – which are the next steps?
- Which help is available from the University and from MBM ScienceBridge GmbH? Where can I find competent contact persons?
- What does the German Act on Employee Inventions (*Arbeitnehmererfindergesetz*) provide for University employees? What is the status of Master and Ph.D. Students?
- Publication vs. Patent? How to manage both?
- Strategy with intellectual property (IP) rights.
- Examples of successful projects.
